

МОРФОСИНТАКТИЧЕН ТАГСЕТ НА СТАРОБЪЛГАРСКИЯ КНИЖОВЕН ЕЗИК

По проекта *Информатика, граматика, лексикография* беше заложено създаването на автоматизиран морфологичен анотатор (автоматичен тагер), който да улесни работата със средновековни славянски текстове и да ускори изработката на различни лексикографски наръчници като речник-индекси на отделни паметници или речници на езика на отделни старобългарски писатели. Тагерът ще се използва и при изработването на електронния исторически речник на БЕ, който се изгражда върху електронния вариант на Старобългарски речник. Т. 1, 2. С., 1999, 2009, издаден от БАН, като материалът от старобългарския корпус, представен в него (11 500 лексеми), се допълва с лексикален материал от електронния диахронен корпус (<http://cyrillomethodiana.uni-sofia.bg>), който вече съдържа над 130 средновековни текста с различен обем и жанрова специфика с над един милион словоформи.

Тагерът е предназначен да анализира морфологично всяка словоформа от електронния исторически корпус и речника, като ѝ приписва съответните морфосинтактични характеристики.

За целите на морфологичната анотация (тагирането) според частите на речта беше необходимо да се въведат предварително зададени морфосинтактични характеристики на всяка една от тях, като се изработи специален набор от морфологични етикети (тагове), който отразява граматичните особености на старобългарския книжовен език. Като мнемонично описание на определена част на речта и нейните граматични характеристики тагът съдържа поредица от букви (главни, малки) и/или цифри, като всяка позиция отговаря на една граматическа характеристика.

ОБЩИ ПОЛОЖЕНИЯ

Старобългарският тагсет беше създаден на базата на съществуващия тагсет за съвременния български език, дефиниран и използван в синтактичния корпус BulTreeBank (върху 215 149 думи от съвременния български език) – детайлно описание на етикетите вж. у *Simov, Osenova, Slavcheva*. BTB-TR03: BulTreeBank Morphosyntactic Tagset, 2004 (<http://www.bultreebank.org/TechRep/BTB-TR03.pdf>). Структурата на таговете изглежда по следния начин: първата буква е винаги главна и отговаря на част на речта, всяка следваща буква кодира присъщите ѝ граматически характеристики, които се изреждат в точно определен постоянен ред. Всеки таг съответства на член на парадигмата на определен клас лекси-

кални единици. Като цяло сиглите за частите на речта и граматическите им категории следват възприетите съкращения в корпуса BulTreeBank, допълнени (или заменени) с нови с оглед на морфосинтактичната специфика на старобългарския език, който за разлика от новобългарския език изразява синтактичните отношения не аналитично, а синтетично чрез падежните форми на имената.

За пълното граматично описание и анализ на даден език тагсетът би трябвало да съдържа достатъчна (по възможност максимална) морфосинтактична информация. Детайлното и изчерпателно морфологично описание на лексикалните единици е гаранция за неговото пълноценно и широко практическо приложение и за по-висока степен на разпознаваемост на формите. Големината на тагсета зависи от богатството на морфосинтактичната система на даден език – напр. в испанския език броят на таговете (етикетите) е към 475, в съвременния български език – между 600 и 700, а в старобългарски – над 2200 (около 1150 са таговете за съществителните, прилагателните, местоименията и местоименните прилагателни и наречия). Големият брой тагове при имената и именните глаголни форми се определя от граматичната структура на старобългарския език – синтетичен (флективен) език с богата морфосинтактична система – шест падежа и звателна форма, три числа, прости и сложни форми при прилагателните имена, два вида синтетични компаративни форми (прости и сложни), две неизменяеми глаголни форми, пет вида причастия и т.н.

Тагсетът, който определя какви форми и значения ще могат да се разпознават автоматично, представлява изкуствен конструкт и държим да подчертаем, че той не отразява изцяло нашите разбирания за езиковата система на старобългарския език, за йерархията на категориите и опозициите. В редица случаи решенията за структурата на таговете са взимани по целесъобразност и в зависимост от възможностите на софтуера и нуждите на бъдещите потребители на системата.

Във флективните езици, какъвто е и старобългарският, броят на словоформите не съвпада с броя на клетките на системата, защото различни граматически значения могат да се изразят с окончания, които съвпадат от формална гледна точка. В рамките на дадена словоизменителна парадигма в старобългарски една словоформа може да бъде описана с два и повече тага, напр. *града* = род. п. ед. ч. = им.-вин. п. дв. ч. По същата причина графичните омоними могат да принадлежат и към различни словоизменителни парадигми, напр. формата *водинъ* като форма за 1 л. мн. ч. участва в парадигмата и на сегашно време, и на повелително наклонение, а в същото време е и част от парадигмата на сегашното страдателно причастие, където заема клетките на им.-вин. п. ед. ч. м. р. и на род. п. мн. ч. на трите рода. Затова трябваше да решим в кои случаи таговете ще отговарят на броя на словоформите и в кои на броя на клетките в системата.

Старобългарският тагсет съдържа отделни тагове за всички омонични форми, които са получени в резултат на действието на праславянската тенденция към възходяща звучност. Тази фонетична тенденция засяга краесловните тематични и атематични наставки и окончанията и води до чисто формално съвпадение на редица форми, които първоначално са се различавали, срв. напр. им. п. ед. ч. *gord-o-s > gord -ŭ-s > gord -ŭ > градъ = вин. п. ед. ч. *gord-o-n > gord -ŭ-n > gord -ŭ > градъ, 2 л. ед.ч. аорист *rek-e-s > реѣ = 3 л. ед. ч. аорист *rek-e-t > реѣ, им. п. ед. ч. м. р. на сег. деят. причастие *nes-ont-s > *nesons > nesuns > nesŭ > несы = им. п. ед. ч. ср. р. на сег. деят. причастие *nes-ont-ø > *nesonø > nesuŭ > несы. Вторичната омонимия, която настъпва в хода на фонетични и морфологични изравнявания в историческия развой на българския език, напр. им. п. мн. ч. м. р. *вольши* и им. п. ед. ч. ж. р. *вольши*; тв. п. ед. ч. *градомъ/ъ* и дат. п. мн. ч. *градомъ*) не влияе върху броя на таговете¹. За всяка старобългарска словоформа (вкл. и омонимичните) е изготвен отделен таг. Изключение се допуска само за парадигмата на двойствено число на имената, местоименията и причастията, която притежава само три форми: за им. – вин. п. (бележи се със знак О (nominative/accusative case), род. – мест. п. → G (genitive/locative case), дат. – тв. п. → D (dative/instrumental case). Този синкретизъм е наследство от индоевропейския праезик и е присъщ на всички индоевропейски езици и само личното местоимение за 1 л. различава винителната и именителната си форма.

Праславянската омонимия при им. и вин. п. м. и ср. р. ед. ч. е била безпроблемна при назоваване на предмети, но е създавала затруднения при лица и одушевени същности, свързани с различаването на субекта (изразяван с им. п.) и обекта (изразяван с вин. п.). Затова при имената от одушевления клас винителният падеж е започнал да се разграничава от именителния, като е получил окончание за родителен падеж. Така в праславянски (старобългарски) в ед. ч. се появява мъжколичният подрод (употреба на род. п. със значение на вин. п.) при съществителни, прилагателни, местоимения и причастия. Този подрод (при названия на лица, животни, персонификации) е отразен в тагсета със специален етикет E (genitive/accusative case) въпреки че няма задължителен и постоянен характер. Родително-винителната форма е била присъща и на имената от старите ŭ- и ег-основи ж.р. и на техните наследници в старобългарски и затова са предвидени съответните означения и в техните тагове.

¹ Тя обаче е взета под внимание при изработването на *граматическия речник на старобългарския книжовен език*, в който към отделните тагове се посочват всички възможни фонетични и морфологични варианти на описваната форма. Граматическият речник е друг важен помощен инструмент за създаването на надежден анотатор, който да позволи и лематизацията на отделните словоформи, като ги отнесе към определена парадигма.

Финитните глаголни форми са описани със 183 етикета (тага), като на всеки таг отговаря по една микрословоформа, т.е. по една гloseмна дума (напр. *щях да чета* включва 3 микрословоформи). Другояче казано, в автоматичния морфологичен анотатор под дума (token) се разбира последователността от символи между два интервала. Това означава, че тагерът не разпознава композирани глаголни форми от типа на *исмьъ бъралъ, расплътъ бждетъ*, а единствено синтетични форми.

Предварително беше заложено, че автоматичният морфологичен анализатор трябва да различава пълнозначните и спомагателните глаголи. Решихме също така, че тагерът следва да дава информация за това дали даден глагол е от свършен или несвършен вид, както и дали е транзитивен, или интранзитивен, макар че опозицията транзитивност/интранзитивност не формира граматическа категория, а разделя глаголната лексика на лексикално-граматически разрези. Тези решения бяха продиктувани от разбирането ни, че автоматичният морфологичен анализатор е софтуерен инструмент, който ще се използва не само от специалисти езиковеди и лексикографи, но следва да е в помощ и на неспециалисти, студенти, и всички онези, които се интересуват от българското книжовно наследство. И затова колкото повече информация предоставя този инструмент, толкова по-широко ще е неговото приложение.

Нефинитните глаголни форми – причастията, инфинитивът и супинът, са описани с общо 890 тага.

Числителните имена в старобългарски са нееднородни в морфологично отношение, като бройните числителни са или местоимения (*ѣдинъ, дѣва, ова*), или прилагателни *триѣ/три, четъриѣ/четъри*, или съществителни с различен граматичен род *платъ, шестъ седмь, осмь, девать, тысшати/тысшшти* и *тъма* са от ж. р., *дестъ* от м. и от ж. р., а *съто* е от ср. р., а образуваните от тях редни числителни са сложни прилагателни. По тази причина тази част на речта не се описва с отделни тагове.

По-нататък следва описание на етикетите на частите на речта (съществителни, прилагателни, местоимения, местоименни прилагателни, наречия, глаголи и служебни думи) и на граматическите им характеристики с оглед на спецификата на старобългарския език. Описанието е придружено с излагане на принципите, въз основа на които е изготвен тагесът.

I. СЪЩЕСТВИТЕЛНИ ИМЕНА (49 ТАГА)

При имената бяха идентифицирани категориите род, число и падеж, които получиха следните означения:

Съществително име	N
Мъжки род	m

Среден род	n
Женски род	f
Единствено число	s
Множествено число	p
Двойствено число	u
Именителен падеж	o
Родителен падеж	g
Дателен падеж	d
Винителен падеж	a
Родително-винителна форма	E
Творителен падеж	i
Местен падеж	l
Звателен падеж	v
Именителен-винителен падеж	O
Родителен-местен падеж	G
Дателен-творителен падеж	D

В тагсета на съществителните означенията на различните категории се появяват в следната последователност:

01	02	03	04
Част на речта	Род	Падеж	Число
N	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

II. ПРИЛАГАТЕЛНИ ИМЕНА (180 ТАГА)

Етикетите на прилагателните включват няколко допълнителни означения: **A**=Adjective за част на речта, **e** (positive degree) за положителна степен, **r** (comparative degree) за сравнителна степен, **i** (indefinite) за простите форми и **d** (definite) за сложните (определени) форми на прилагателните. В таговете на прилагателните означенията се явяват в следната последователност:

01	02	03	04	05	06
Част на речта	Степен	Род	Падеж	Число	Определеност
A	e/r	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u	i/d

III. МЕСТОИМЕНЕНИЯ (620 ТАГА)

Таговете на местоименията съдържат означението **P** (Pronoun) за част на речта и набор от 9 сигли за различните видове местоимения:

Местоимение	P (Pronoun)
Лично местоимение	Pp (Pronoun, personal)
Възвратно-лично	Ppx (Pronoun, personal, reflexive)
Показателно	Pd (Pronouns, demonstrative)
Анафорично	Pc (Pronoun, anaphoric)
Относително	Pr = Pronoun, relative)
Обобщително	Pb = Pronoun, collective)
Въпросително	Pi = Pronoun, interrogative)
Неопределително	Pf = Pronoun, indefinite)
Отрицателно	Pn = Pronoun, negative)
Притежателно	Ps = Pronoun, possessive)
Възвратно-притежателно	Psx = Pronoun, possessive, reflexive)

III.1. ЛИЧНО МЕСТОИМЕННИЕ

Личните местоимения по правило са безродови и имат форми само за първо и второ лице на всички числа. Парадигмата им е суплетивна, което представлява древноиндоевропейско наследство от времето, когато различните форми в парадигмата са представлявали различни лексеми. В дателен падеж на трите числа редом с пълните ударени форми се срещат и кратки енклитични форми, означавани съответно с **l** (full) и **t** (short).

В таговете на личните местоимения граматическите характеристики се изреждат по следния начин:

01	02	03	04	05	06
Част на речта	Тип	Лице	Падеж	Число	Пълна/кратка форма
P	p	1/2	o/g/d/a/E/i/l/v/O/G/D	s/p/u	l/t

III.2. ВЪЗВРАТНО ЛИЧНО МЕСТОИМЕННИЕ

Възвратно-личното местоимение има същите морфологични характеристики като личните местоимения без категорията лице, които се отбелязват в следния ред:

01	02	03	04	05
Част на речта	Тип	Падеж	Число	Пълна/кратка форма
P	px	o/g/d/a/E/i/l/v/O/G/D	s/p/u	l/t

III.3. ПОКАЗАТЕЛНИ МЕСТОИМЕННИЯ

Показателните местоимения **тъь**, **съь**, **онъь**, **объь**, **тъьждѣь**, **съьждѣь** *същият* са нелични родови местоимения и таговете им съдържат информация за граматичния род на съответните словоформи. Информацията за граматическите им характеристики се появява в следния ред:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
P	p	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III.4. АНАФОРИЧНО МЕСТОИМЕННИЕ

Анафоричното местоимение произхожда от старо показателно местоимение, което е загубило формите си за именителен падеж и се употребява енклитично във функция на третолично местоимение в комбинация с формите на показателните местоимения. По тази причина таговете на неговите словоформи се различават от таговете на показателните местоимения само по означението във втора позиция:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
P	c	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III.5. ОТНОСИТЕЛНО МЕСТОИМЕННИЕ

Относителното местоимение в старобългарски се образува от анафоричното, като към съответната форма се прибави частицата *же*. Таговете на относителното местоимение съдържат следните позиции:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
P	r	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III.6. ОБОБЩИТЕЛНО МЕСТОИМЕННИЕ

Обобщителното местоимение *въсь* има същите характеристики, които се кодират по следния начин:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
P	b	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III. 7. ВЪПРОСИТЕЛНИ МЕСТОИМЕННИЯ

Въпросителните местоимения *къто* и *чъто* са безродови и имат форми само за единствено число, като първото се употребява за лица, а второто за предмети. По тази причина таговете на тези местоимения съдържат само следните позиции:

01	02	03	04
Част на речта	Тип	Падеж	Число
Р	i	o/g/d/a/E/i/l/v/O/G/D	s

Въпросителните местоимения **къи**, **къждо**, **чи**, **котоъи** имат форми за трите рода и трите числа и таговете им съдържат следните позиции:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
Р	i	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III.8. НЕОПРЕДЕЛИТЕЛНИ МЕСТОИМЕНЕНИЯ

Неопределителните местоимения в старобългарски се образуват от въпросителните и таговете им се отличават от таговете на въпросителните местоимения само по втората позиция, където стои означението **f** (indefinite). Местоименията **нѣкъто** и **нѣкуто** естествено не притежават категорията род и имат форми само в ед. ч. Граматическите им характеристики са кодирани по следния начин:

01	02	03	04
Част на речта	Тип	Падеж	Число
Р	f	o/g/d/a/E/i/l/v/O/G/D	s

Таговете на местоименията **нѣкъи** и **нѣкѣи** съдържат съответно означения за род и число и са организирани по следния начин:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
Р	f	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III.9. ОТРИЦАТЕЛНИ МЕСТОИМЕНЕНИЯ

Подобно на неопределителните и отрицателните местоимения се образуват от въпросителните. Затова таговете на **никѣтоже**, **ничѣтоже** са организирани в четири позиции:

01	02	03	04
Част на речта	Тип	Падеж	Число
Р	n	o/g/d/a/E/i/l/v/O/G/D	s

а таговете на **никѣиже** и **никѣторѣиже** в пет позиции:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
P	n	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

III. 10. ПРИТЕЖАТЕЛНИ МЕСТОИМЕНЕНИЯ²

Притежателно-личните местоимения *мой, твоя, наш, ваш* подобно на личните местоимения, от чиято основа са образувани, притежават категорията лице, като формите *наш* и *ваш* се употребяват при наличието на група от притежатели, които участват в речевата ситуация. За да се отрази спецификата на този тип местоимения, са въведени следните допълнителни означения: *s* (possessive), *o* един (един притежател), *z* (много притежатели). В резултат на това таговете им са организирани по следния начин:

01	02	03	04	05	06	07
Част на речта	Тип	Брой притежатели	Лице	Род	Падеж	Число
P	s	o/z	1/2	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

Възвратно-притежателното местоимение *свои* не притежава категорията лице и е безразлично спрямо броя на притежателите, затова неговите тагове са по-прости в сравнение с таговете на лично-притежателните местоимения и приличат на таговете на неличните родови местоимения, от които се отличават само по втората позиция:

01	02	03	04	05
Част на речта	Тип	Род	Падеж	Число
P	sx	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

IV. МЕСТОИМЕННИ ПРИЛАГАТЕЛНИ И НАРЕЧИЯ (300 ТАГА)

Местоименните прилагателни и наречия се образуват от корените на неличните местоимения, при което новообразуваното прилагателно или наречие пази значението на изходния корен – показателно, въпросително, обобщително, относително-анафорично, а неопределителните и отрицателните местоимения и наречия се образуват от въпросителните по същия начин, по който неопределителните и отрицателните местоимения се образуват от въпросителните. Различните словообразователни наставки модифицират значението на местоименния корен и дериватите могат да означават качество, количество или степен, време и място.

² Кратките форми *ми, ти, си, нъ, въ,* които могат да изразяват и притежание, не се описват в таговете на притежателните местоимения, тъй като идват от парадигмата на личните местоимения и тагерът не би могъл да ги различава.

В тагсета местоименните прилагателни и наречия се разпределят според корена, от който са образувани, и според значението си, така че първите три позиции в таговете им отбелязват значението на местоименния корен и лексикалното значение на основата.

IV.1. Местоименните прилагателни от показателен корен такъ, такъжде, такъвъ *такъв*, толикъ/толикъжде, селикъ *толкова голям (толкав)*, сиць/ сикъ, сицьвъ *такъв* имат тагове, които започват с означенията **Pda** = Pronoun, demonstrative, attribute, след което следват сиглите за род, падеж и число, така че таговете им изглеждат по следния начин:

01	02	03	04	04	05
Част на речта	Тип	Значение	Род	Падеж	Число
P	d	a	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

IV.2. Местоименните наречия от показателен корен се означават по следния начин:

за място: **Pdl** = Pronoun, demonstrative, location

Тук спадат: съде *тук*, онъде *там*, овъде *тук*, тоу *тук/там*, тамо *на-там*, сѣмо *насам*, онамо *натам*, овамо *насам-натам*, тждоу/тждѣ *оттам*, сждоу/сждѣ *отсам*, отъсждоу/отъсждѣ/отъсждѣ *оттук*, онждоу/онждѣ *оттам/отдалеко*, оноуде/онъде *там*, овждоу/овждѣ *отсам/оттам*, инъде/инъжде *там другаде*, инамо *натам (другаде)*, инждоу/инждѣ *от друго място*, отътоудоу/отътоудѣ/отътоудѣ/отътждоу/отътждѣ/отътждѣ *оттам*

за начин: **Pdm** = Pronoun, demonstrative, manner. Това са: тако, такоже, такожде, тожде *така (по същия начин)*, сице *така*, таче *такаче*, после, иначе, инако *инак*, иначе

за количество: **Pdq** = Pronoun, demonstrative, quantity

толи, толь, толъ, сели, сель, селъ, тольма/тольми *толкова, дотолкова*, толико *толкова (много)*, толикожде *толкова пъти*

за време: **Pdt** = Pronoun, demonstrative, time

тогда(же)/ тъгда/ тогда *тогава*, овъгда/овогда *поякога*, иногда *някога*, отътоли/отътолѣ *оттогава*, отъселѣ *отсега*

IV.3. Местоименните прилагателни от анафоричен корен имат тагове, започващи с означението **Pra** = Pronoun, relative, attribute, след което идват означенията за род, падеж и число. Таговете им се различават от таговете на показателните местоименни прилагателни само във втората позиция:

01	02	03	04	04	05
Част на речта	Тип	Значение	Род	Падеж	Число
P	r	a	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

Местоименните наречия от корена на относително-анафоричното местоимение получават следните тагове:

за място: Prl = Pronoun, relative, location

иде/ ижде *някъде там*, идеже/иждеже *където*, тамо(же) *където/накъдето*, ждоу(же)/ ждѣ/ ѝждоу(же)/ ѝждѣ (от)*където*, вѣнѣтрьждоу *отвътре*, вѣнѣждоу *отвѣн*, вѣнѣ/ вѣнѣ *вѣн*, навѣн

за начин: Prm = Pronoun, relative, manner

ѣко, ѣкоже *като*, както

за количество: Prq = Pronoun, relative, quantity

ѣли/ ѣль/ ѣлѣ *колко много*, почти; ѣльна(же), ѣлни(же) *доколкото*;

за време: Prt = Pronoun, relative, time

ѣгда/ѣдга *когато*, вѣнегда *в този момент*, в който, донѣлиже *докогато*, докато; отѣнѣлиже *откогато*, откакто

IV.4. Местоименното прилагателно от обобщителен корен всѣкъ, всакъ *всеки*, *всякакъв* се описва с тагове, започващи с означението **Pba** = Pronoun, collective, attribute, след което идват означенията за род, падеж и число. Таговете му се различават от тези на показателните и относително-анафоричните местоименни прилагателни само във втората позиция:

01	02	03	04	04	05
Част на речта	Тип	Значение	Род	Падеж	Число
P	b	a	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

IV.5. Местоименните наречия от обобщителен корен имат следните тагове:

за място: Pbl = Pronoun, collective, location

всѣде/всѣжде *навсякъде*, всѣмо *навсякъде (на всички страни)*, всѣдоу/всѣдѣ *отвсякъде*, обождоу *от двете страни*

за начин: Pbm = Pronoun, collective, manner

всѣко, всако, всѣчскы *по всякакъв начин*, *всячески*, *обовако двояко*

за време: Pbt = Pronoun, collective, time

всѣгда *винаги*

IV.6. Местоименните прилагателни от въпросителен корен колкъ *колко голям (колкав)* и **какъ** *какъв* се описват с тагове, които започват с **Pia** = Pronoun, interrogative, attribute. Таговете им са като на останалите местоименни прилагателни с изключение на сиглата във втора позиция:

01	02	03	04	04	05
Част на речта	Тип	Значение	Род	Падеж	Число
P	i	a	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

IV.7. Местоименните наречия от въпросителен корен се означават по следния начин:

за място: Pīl = Pronoun, interrogative, location

къде къде, камо накъде, къде/къде откъде

за начин: Pīm = Pronoun, interrogative, manner

како как

за количество: Pīq = Pronoun, interrogative, quantity

коли/коля/коля (до)колко, докаква степен, коляна/коляни колко, доколко; koliko колко

за време: Pīt = Pronoun, interrogative, time

когда/когда/къгда кога, откъколя кога, , доколя докога

IV.8. Неопределителните местоименни прилагателни нѣколикъ *няколко*, *нѣкакъ* *някакъв*, *нѣкоторѣи* *някой* имат тагове, които започват с **Pfa** = Pronoun, indefinite, attribute. Разликата и тук е само във втората позиция:

01	02	03	04	04	05
Част на речта	Тип	Значение	Род	Падеж	Число
P	f	a	m/f/n	o/g/d/a/E/i/l/v/O/G/D	s/p/u

IV.9. Неопределителните местоименни наречия имат следните тагове:

за място: Pfl = Pronoun, indefinite, location

нѣкъде *накъде*,

за начин: Pfm = Pronoun, indefinite, manner

нѣкако *някак*

за време: Pft = Pronoun, indefinite, time

нѣкогда/нѣкогда/нѣкъгда *някога*, *нѣколи* *някога*, *преди*

IV. 10. Местоименни прилагателни от отрицателен корен:

Pna = Pronoun, negative, attribute

николикъ, никакъ(жѣ) *никакъв*, *никоѣи* *никой*

IV.11. Местоименни наречия от отрицателен корен:

за място: Pnl = Pronoun, negative, locatio

никъде(жѣ) *никъде*, *никамо* *никъде*, *наникъде*

за начин: Pnm = Pronoun, negative, manner

никако(жѣ) *никак*

за количество: Pnq = Pronoun, negative, quantity

николико, *николикожѣ* *николко*

за време: Pnt = Pronoun, negative, time

никогда/никогда/никъгда *никога*, *николи(жѣ)* *никога*

V. ГЛАГОЛ

Грамматическите категории на глагола бяха определени съгласно традиционната граматика. Отделихме следните граматически значения: лице, число, вид (свършен и несвършен), време (сегашно време, аорист, имперфект), наклонение (изявително и повелително), залог. Последователно се отбелязват пълнозначните и спомагателните глаголи, както и категорията транзитивност/интранзитивност на глаголите.

V.1. СПРЕГНАТИ ГЛАГОЛНИ ФОРМИ

Таблицата съдържа означенията на морфологичните категории, които се описват в тагсета на спрегнатите глаголни форми:

Глагол	V
Пълнозначен	p
Спомагателен	aux
Свършен вид	p
Несвършен вид	i
Транзитивен	t
Интранзитивен	i
Изявително наклонение	F
Повелително наклонение	z
Залог	a/v
Сегашно време	r
Аорист	o
Имперфект	m
Обобщено минало време (претерит) ³	t

Както отбелязахме, сложните (композирани) форми за време, наклонение и залог не могат да бъдат разпознати от тагера и затова на този етап не се описват в тагсета. По същата причина и таговете на финитните глаголни форми съдържат само символа за деятелен залог, а формите на спомагателния глагол *виць*, с които се образуват част от формите за условно наклонение, се описват отделно. В таговете граматическите значения на глагола се явяват в следната последователност:

01	02	03	04	05	06	07	08	09
Част на речта	Тип	Вид	Транзитивност	Наклонение	Залог	Време	Лице	Число
V	p/aux	i/p	t/i	f/z	a	o/r/m/t	1/2/3	s/p/u

³ Въведено е, за да се опишат миналите деятелни причастия, които се образуват от основа, която не съвпада с аористната.

Спомагателните глаголи се представят като списък думи със собствени парадигми. В старобългарски истински спомагателен глагол е само екзистенциалният глаголът **выти**, чиито форми: **юсмь, быхъ, бждж, вимь, вѣхъ, нѣсмь**, се образуват от различни основи и имат различно граматическо значение, а понякога и различно лексикално значение.

V.2. НЕЛИЧНИ ГЛАГОЛНИ ФОРМИ

Неличните форми на глагола в старобългарски включват причастията, които представляват отглаголни прилагателни и следователно се променят по род, число и евентуално падеж, и две неизменяеми форми - инфинитив и супин, които са наследници на петрифицирани форми на старо отглаголно съществително и функционират като допълнение към други глаголи.

V.2.1. Старобългарският глагол притежава три деятелни и две страдателни причастия, като така нареченото елово причастие (минало деятелно II) се употребява само предикативно за образуването на сложни минали времена и не се променя по падеж, т.е. формите му не образуват склонение⁴. Освен това парадигмата на причастията в старобългарски е дефективна, доколкото свършените глаголи не могат да образуват сегашни причастия, а интранзитивните глаголи нямат страдателни причастия. Подобно на прилагателните, когато са употребени атрибутивно, причастията могат да имат и сложни (определени) форми.

Хибридноста на формите на причастията, които притежават и глаголни, и именни характеристики, се отразява на сложността на таговете, които включват означения както за базисните глаголни категории, така и за присъщите на прилагателните граматически характеристики, и съдържат 12 позиции:

01	02	03	04	05	06	07	08	09	10	11	12
Част на речта	Тип	Вид	Транзитивност	Наклонение	Залог	Време	Лице	Число	Род	Падеж	Определеност
V	p/aux	i/p	t/i	f/z	a/p	o/t	-	s/p/u	m/f/n	o/g/d/a/E/i/l/v/O/G/D	i/d

V.2.2. Таговете на неизменяемите нелични глаголни форми (инфинитив и супин) съдържат само пет позиции, като първите четири съдържат характеристиките, присъщи на всички глаголни форми, а на пета позиция в графата за наклонение се поставя означение **g** (infinitive) или **q** (supine):

⁴ Вече казахме, че на този етап тагсетът отличава само микрословоформата в рамките на композираната глаголна словоформа и затова както деятелните, така и страдателните причастия, участващи в такива форми, се описват отделно.

01	02	03	04	05
Част на речта	Тип	Вид	Транзитивност	Наклонение
V	p/aux	i/p	t/i	g/q

VI. СЛУЖЕБНИ ДУМИ

Несамостоятелните части на речта предлози/задлози, съюзи и частици се изреждат като отделен списък, като таговете им съдържат само означението за съответната част на речта, както следва :

Част на речта	Означение
Предлог	R (Preposition)
Задлог	S
Съюз	C (Conjunction)
Частица	P (Preposition)
